September 2019

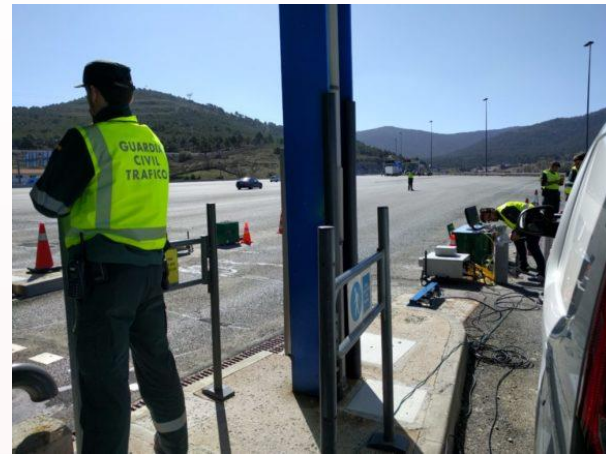

European LIFE Project

# Progress

- The campaign continues in Madrid. To date, nearly 600,000 vehicles have been measured in the city.

- The second phase of the validation begins, Ciemat is evaluating the performance of the RSD+

- Published the first results of the operational campaign carried out with the Civil Guard and Europol. More than 50 intentionally modified trucks have been found and fined
- The Demo begins in Sofia, in order to monitor the fleet of buses in the Bulgarian capital and repair the most polluting buses.
- The project has organized the car exhaust day 2019 on June 28 with more than 120 participants

# Progress

- It is available in the web a questionnaire where the drivers can express their option on the project, as well as request a report on the status of their emissions.
- The calculator has been launched, a tool to inform drivers about the impact of their emissions on air quality. It is powered with data collected by the RSD

- During the month of April the second monitoring meeting took place

# Events

## Brussels

On February 26 and 27, the "Zero emission cities: exchange of best-practices between EU cities and regions" conference, which included a session on Remote Sensing, took place.

## ITS Awards

LIFE GySTRA was awarded the ITS awards in the ITS and environment modality. The project representatives received the award given by Mr. Ezequiel Domínguez Lucena, General Coordinator of Planning, Urban Development and Mobility at the Madrid City Council.

## SOFAir

SOFAIR is an international high-level conference on air pollution, initiated by the Mayor of Sofia. It was attended by policymakers, scientists, experts and representatives of the private sector and non-governmental organizations.

## TAP 2019 - Tessalonika

OPUS representatives presented the project at the International Transport and Air Pollution Conference held in Greece last May

## Next Steps

- Measurement campaigns continue in Madrid and Sofia

- Meetings with the City Council of Valladolid, Madrid, or the OCU among others, to promote sustainable mobility policies
- Presentation of LIFE GySTRA at Ecomondo and at the 1st Sabadell Air Quality Congress
